Topics in this lesson

- What is forex
- What is a stock
- Which to begin with

Illustrative chart — for education only. Not financial advice.

Explanation

Forex is the market for exchanging one currency for another, quoted in pairs such as EUR/USD. It is the largest and most liquid market in the world and trades 24 hours a day across global sessions.

A stock represents part-ownership of a company. Stock markets open during exchange hours and are influenced by company results, the economy and investor sentiment.

Beginners often start with a small number of forex pairs or a few well-known stocks, because focus beats spreading yourself thin. FX Cartel teaches both, starting with the fundamentals.
