

03 · Candlestick patterns

FXC Master · Class notes (view only)

Topics in this lesson

- Pin bars
- Engulfing
- Context matters

Illustrative chart — for education only. Not financial advice.

Explanation

Certain candle shapes hint at a shift in control. A pin bar with a long wick shows rejection of a price; an engulfing candle shows one side overwhelming the other.

No pattern works in isolation. The same pin bar at a strong resistance zone means far more than one in the middle of nowhere.

We always combine patterns with structure and zones — never trade a pattern blind.
