

01 · Liquidity & smart money

FXC Pro · Class notes (view only)

Topics in this lesson

- Where liquidity sits
- Stop hunts
- Institutional footprints

Illustrative chart — for education only. Not financial advice.

Explanation

Large participants need liquidity to fill their orders, and it pools around obvious highs, lows and round numbers where many stops rest.

Price often sweeps these areas before moving in the intended direction — what many retail traders experience as a stop hunt.

Reading where liquidity sits helps you anticipate these moves instead of being caught by them.
